

My Portfolio My Work My Passion

"Creativity Comes With Passion And Enthusiasm"

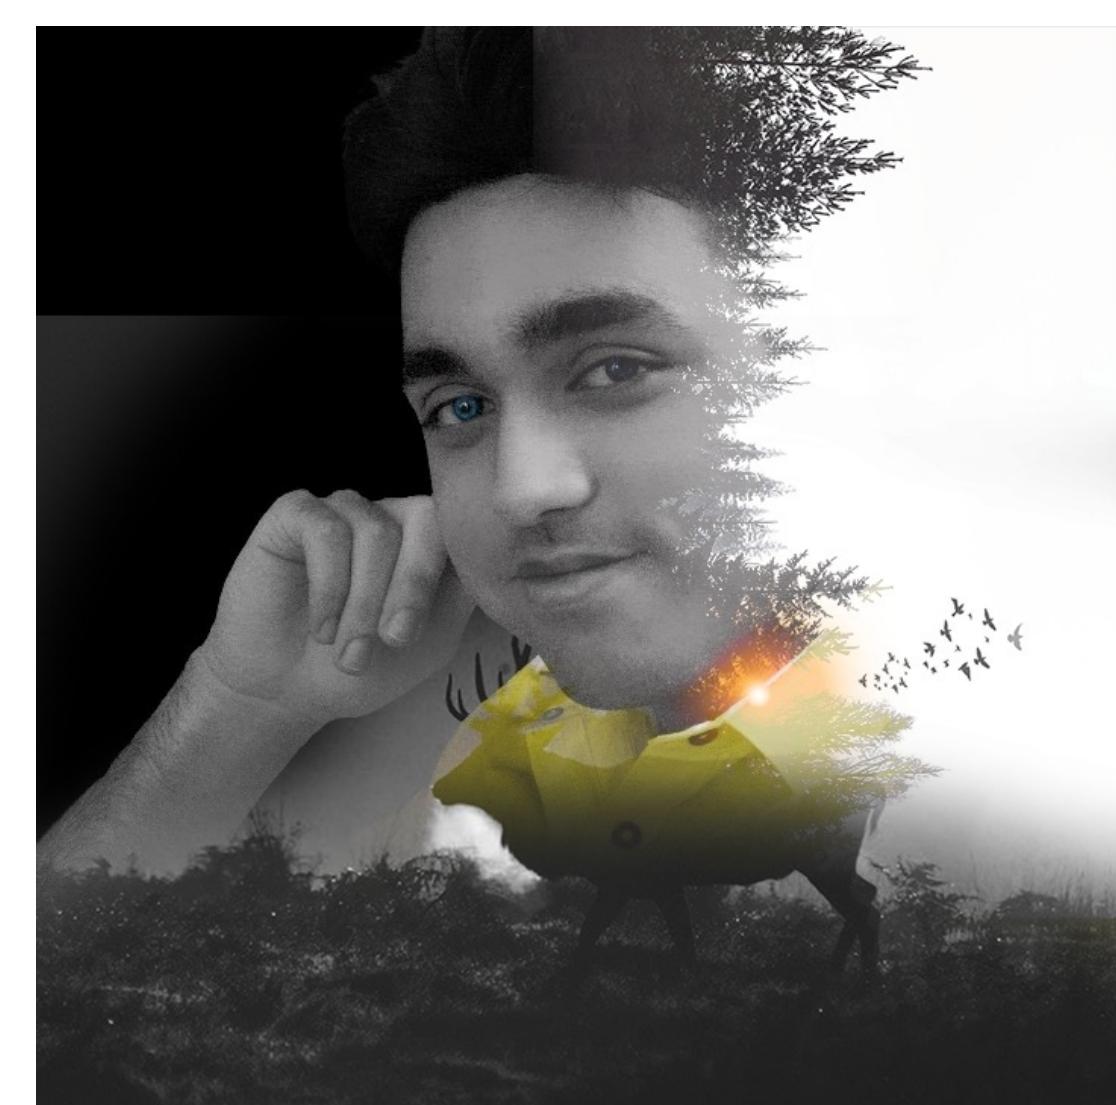

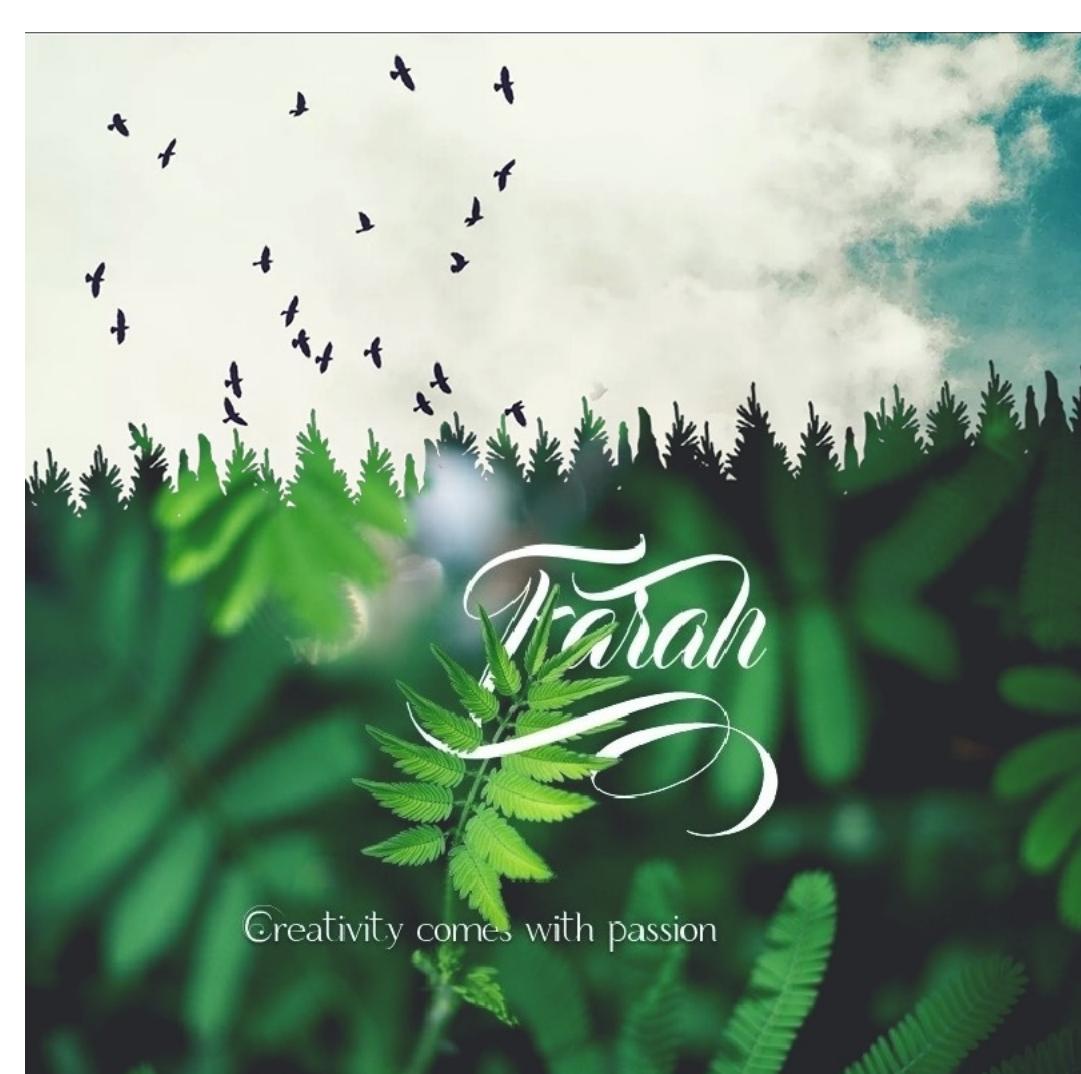

Photography is an art of capturing the beauty of nature and more. In this way one can preserve his/her work. In addition, editing has opened many doors to further creativity as well. I love editing photos and videos

Besides photography and videography, there are other ways to show more creativity. Webdevelopment, it sounds like a boring work of writing coding only. But it is more engaging. It is a detail oriented work and needs more attention, it is very creative work.

Videography or movie making is an interesting but time consuming job. It requires more and in depth perception. There are many phases of video/film production. Which includes story/idea, pre-production, production, post-production and finally editing.

About Us Do Your Work With Passion

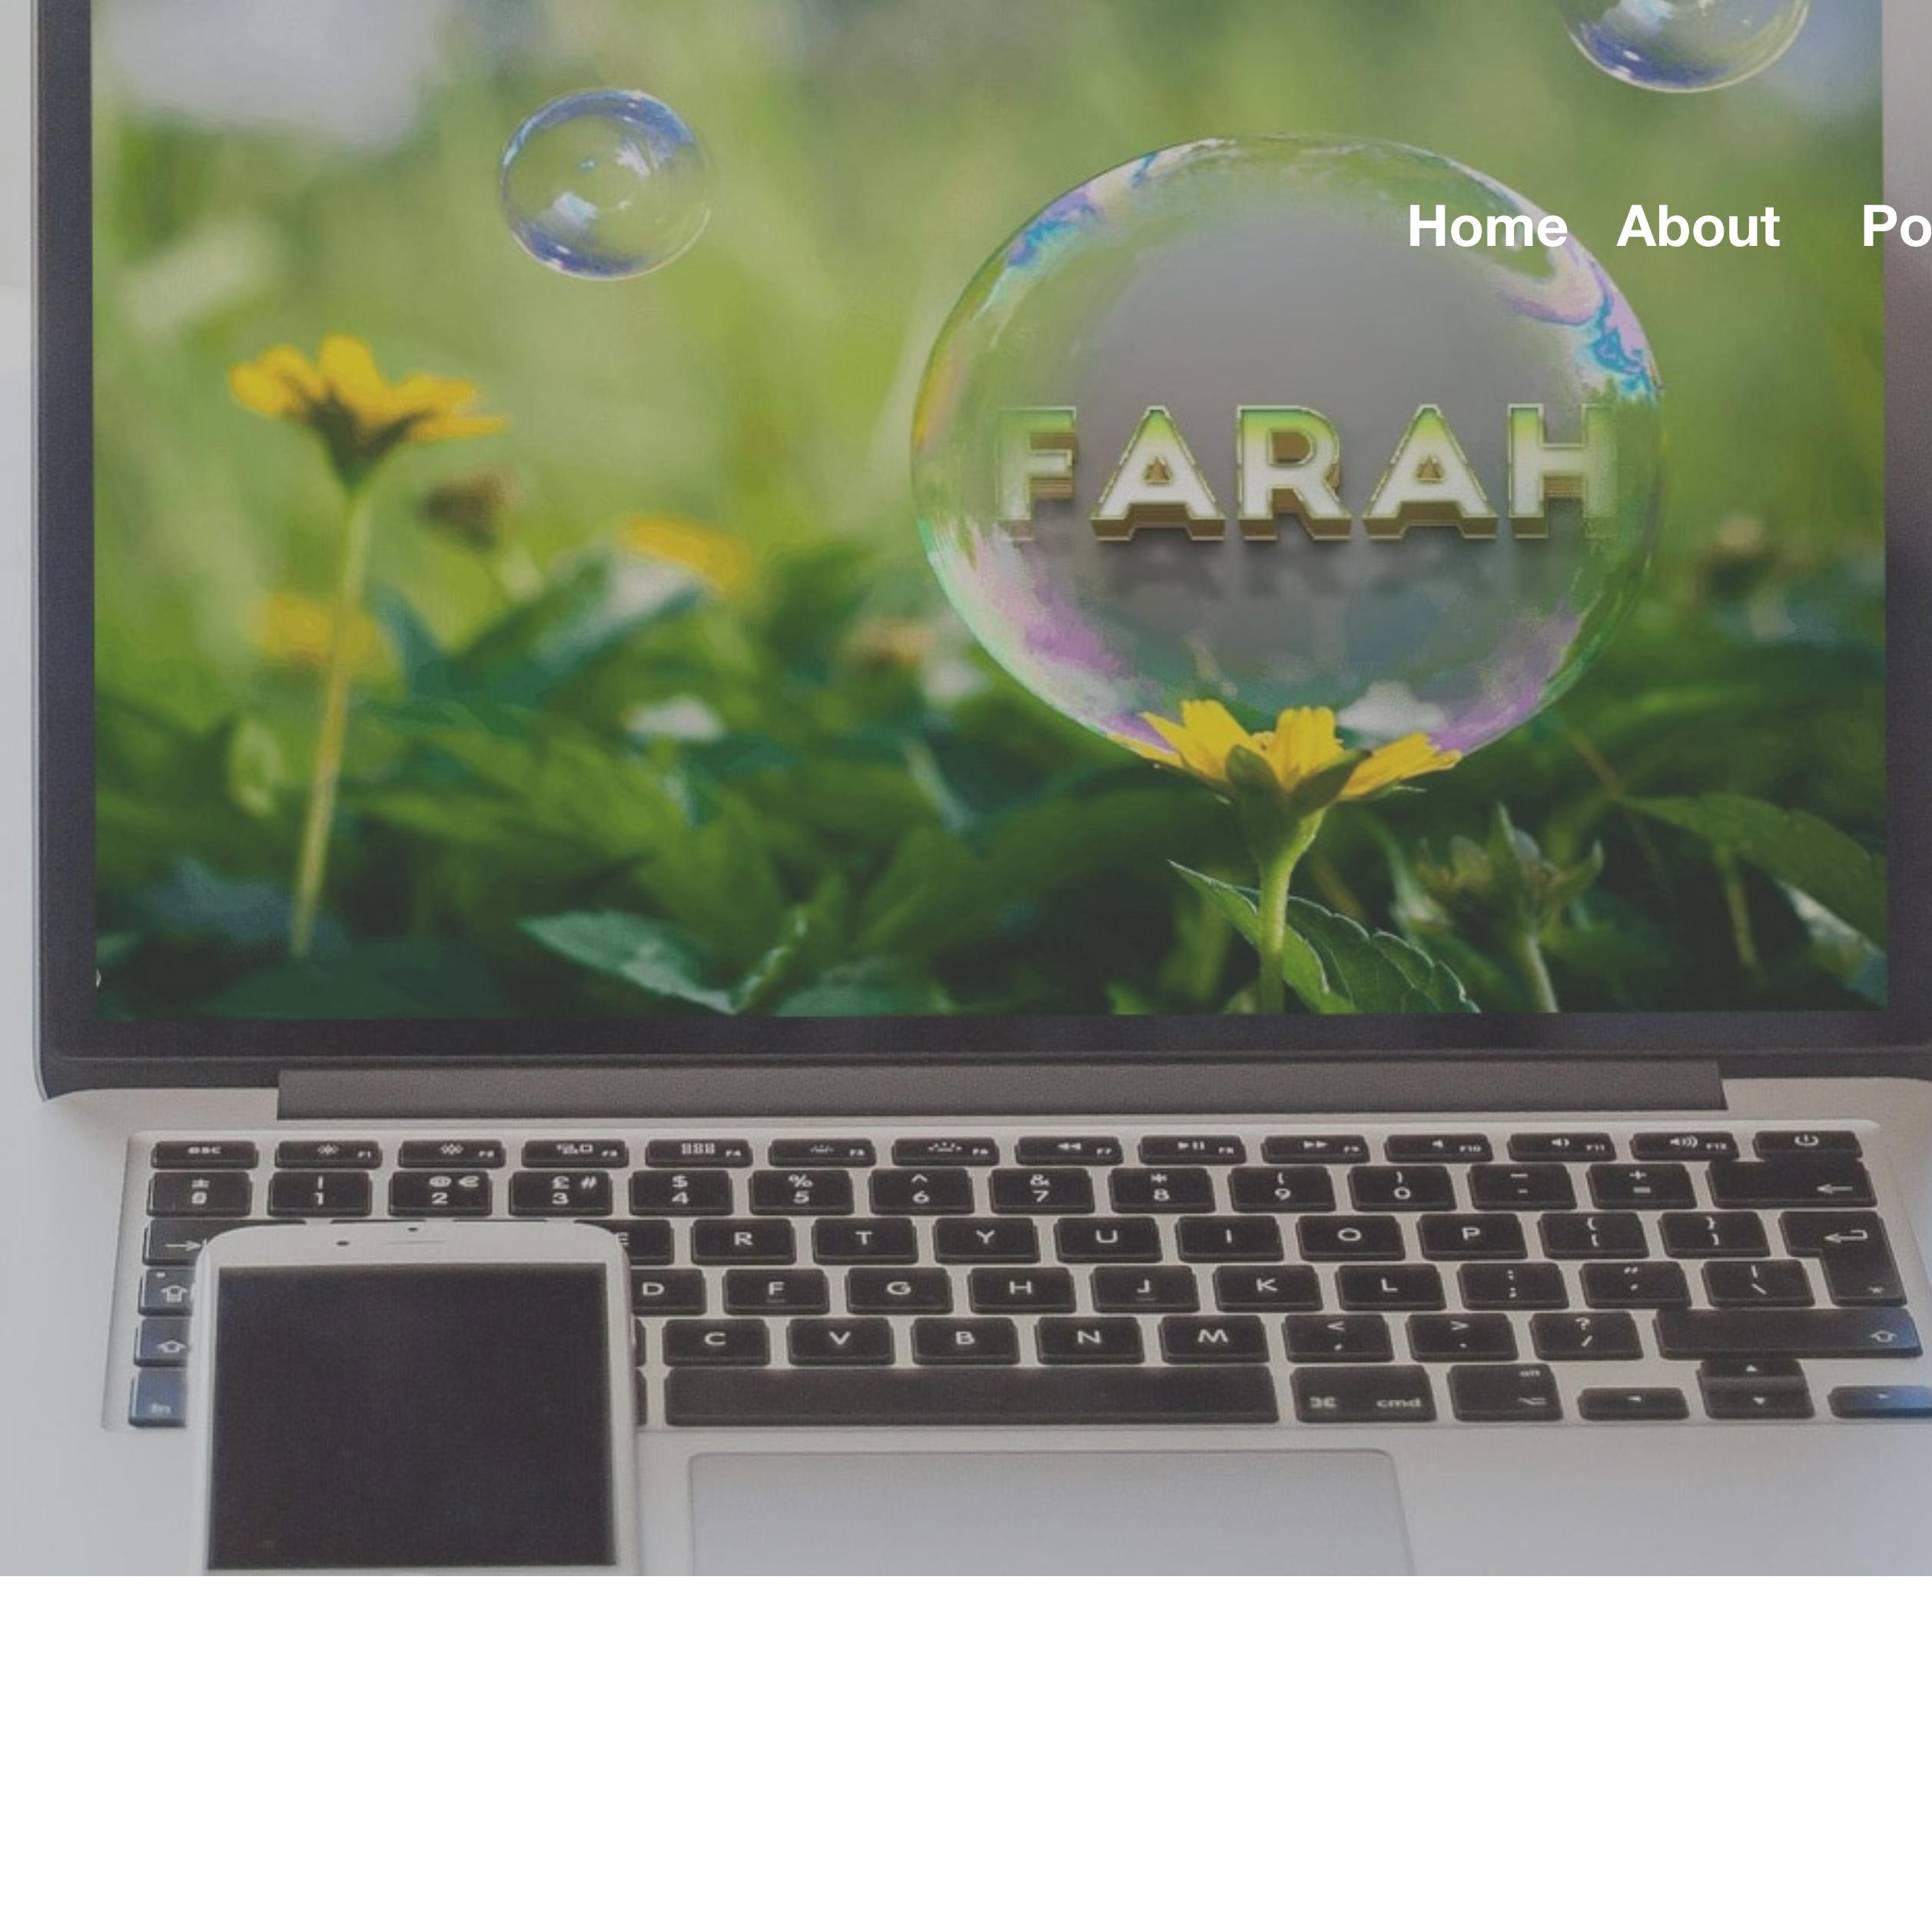

"Creative Work Sparks My Enthusiasm"

My passion is all about digital arts and design, photo, and video editing, photography, painting, stained glass painting, interior decor, and floral design. Creative work fascinates me a lot, and I want to start my career in the profession of web development and digital design. That's why I have started upgrading my studies in Interactive Media Design. This program has provided me a solid foundation of CMS (content management system), design thinking, design foundation, user experience (UX) / user interface (UI) design, photography, video foundation, motion graphics, media communication and much more. Interactive Media Design program is designed to prepare for a variety of careers in the digital media industry including Web-design and programming, as well as

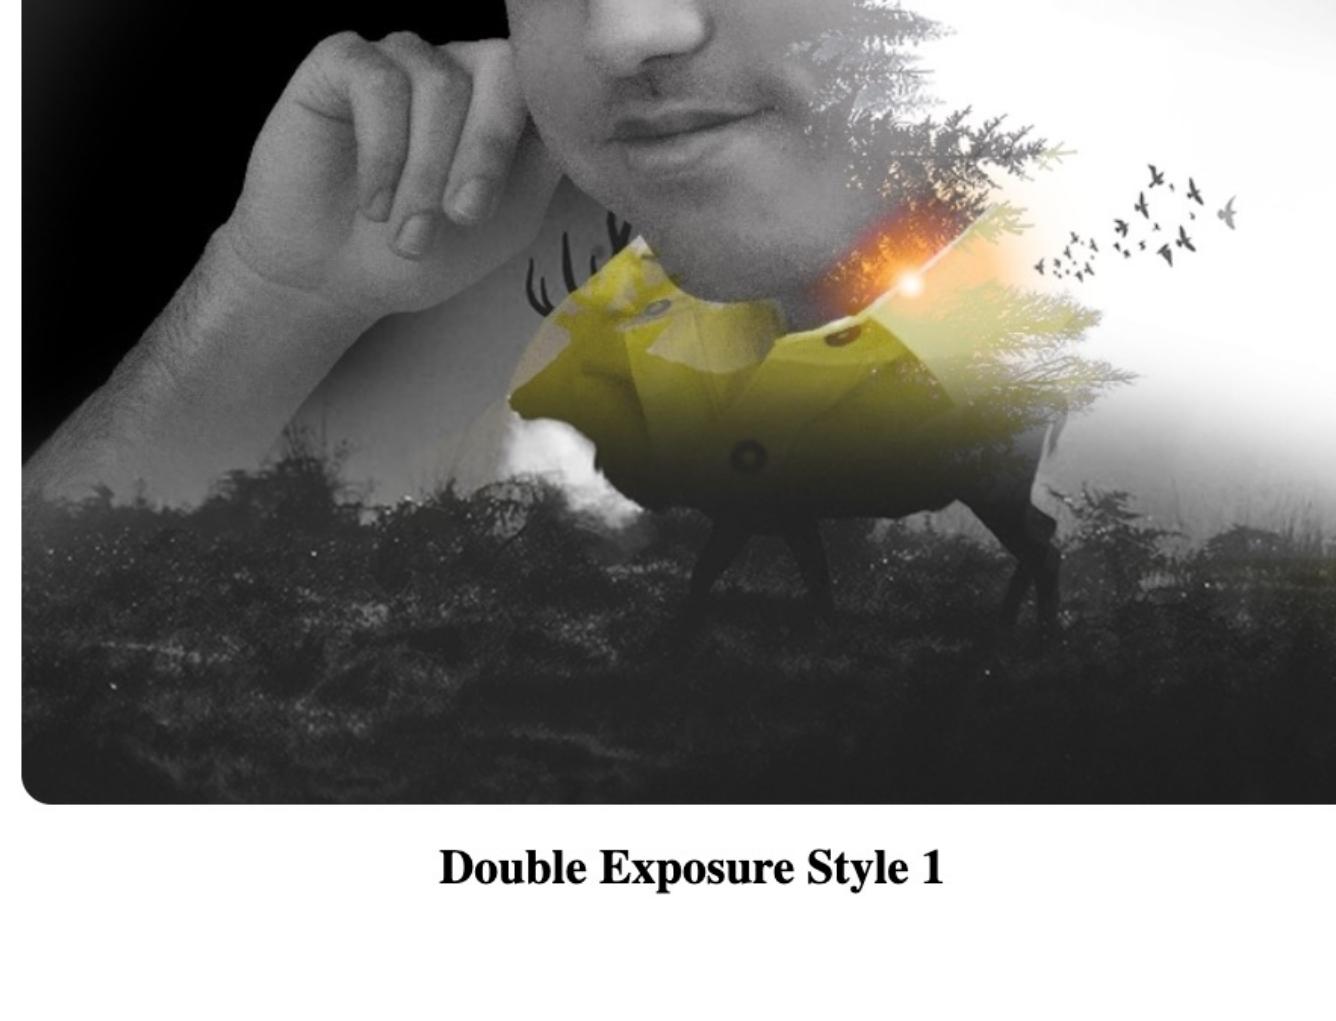

Furthermore, specific elective courses, prepares us towards specializing as a video producer or a web developer, or one can choose to remain as a generalist, depending on interests. In addition, individual and team-based projects under the guidance of a faculty, industry experts in the media field are teaching us best way to put hands on practice I am gaining practical experience while working on various projects.

Photography and Editting

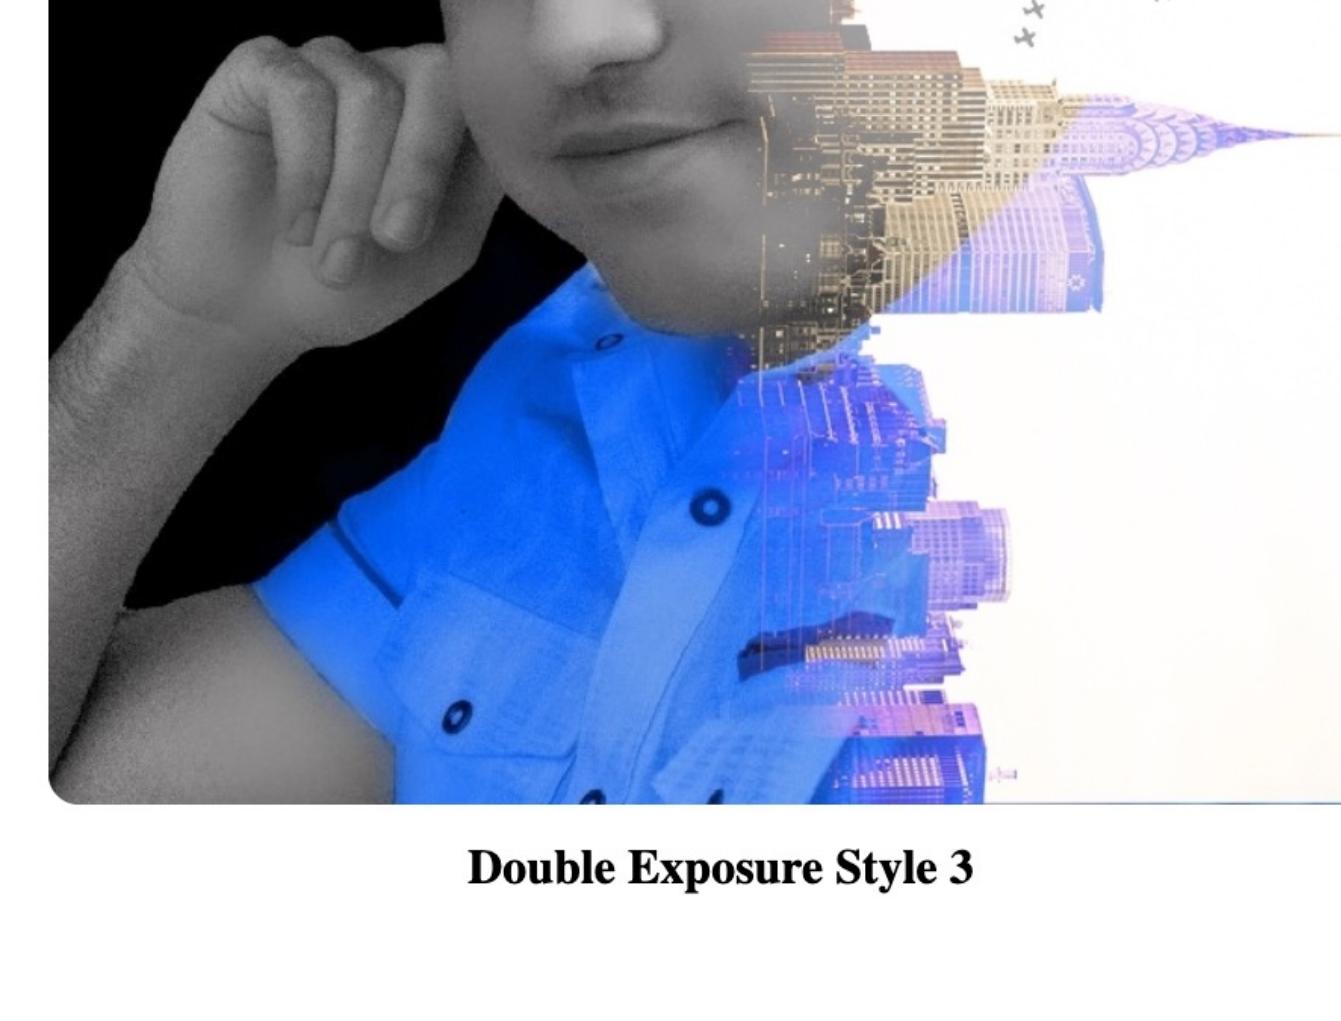

Below are some of my work sample. I have prepared all these as part of my projects.

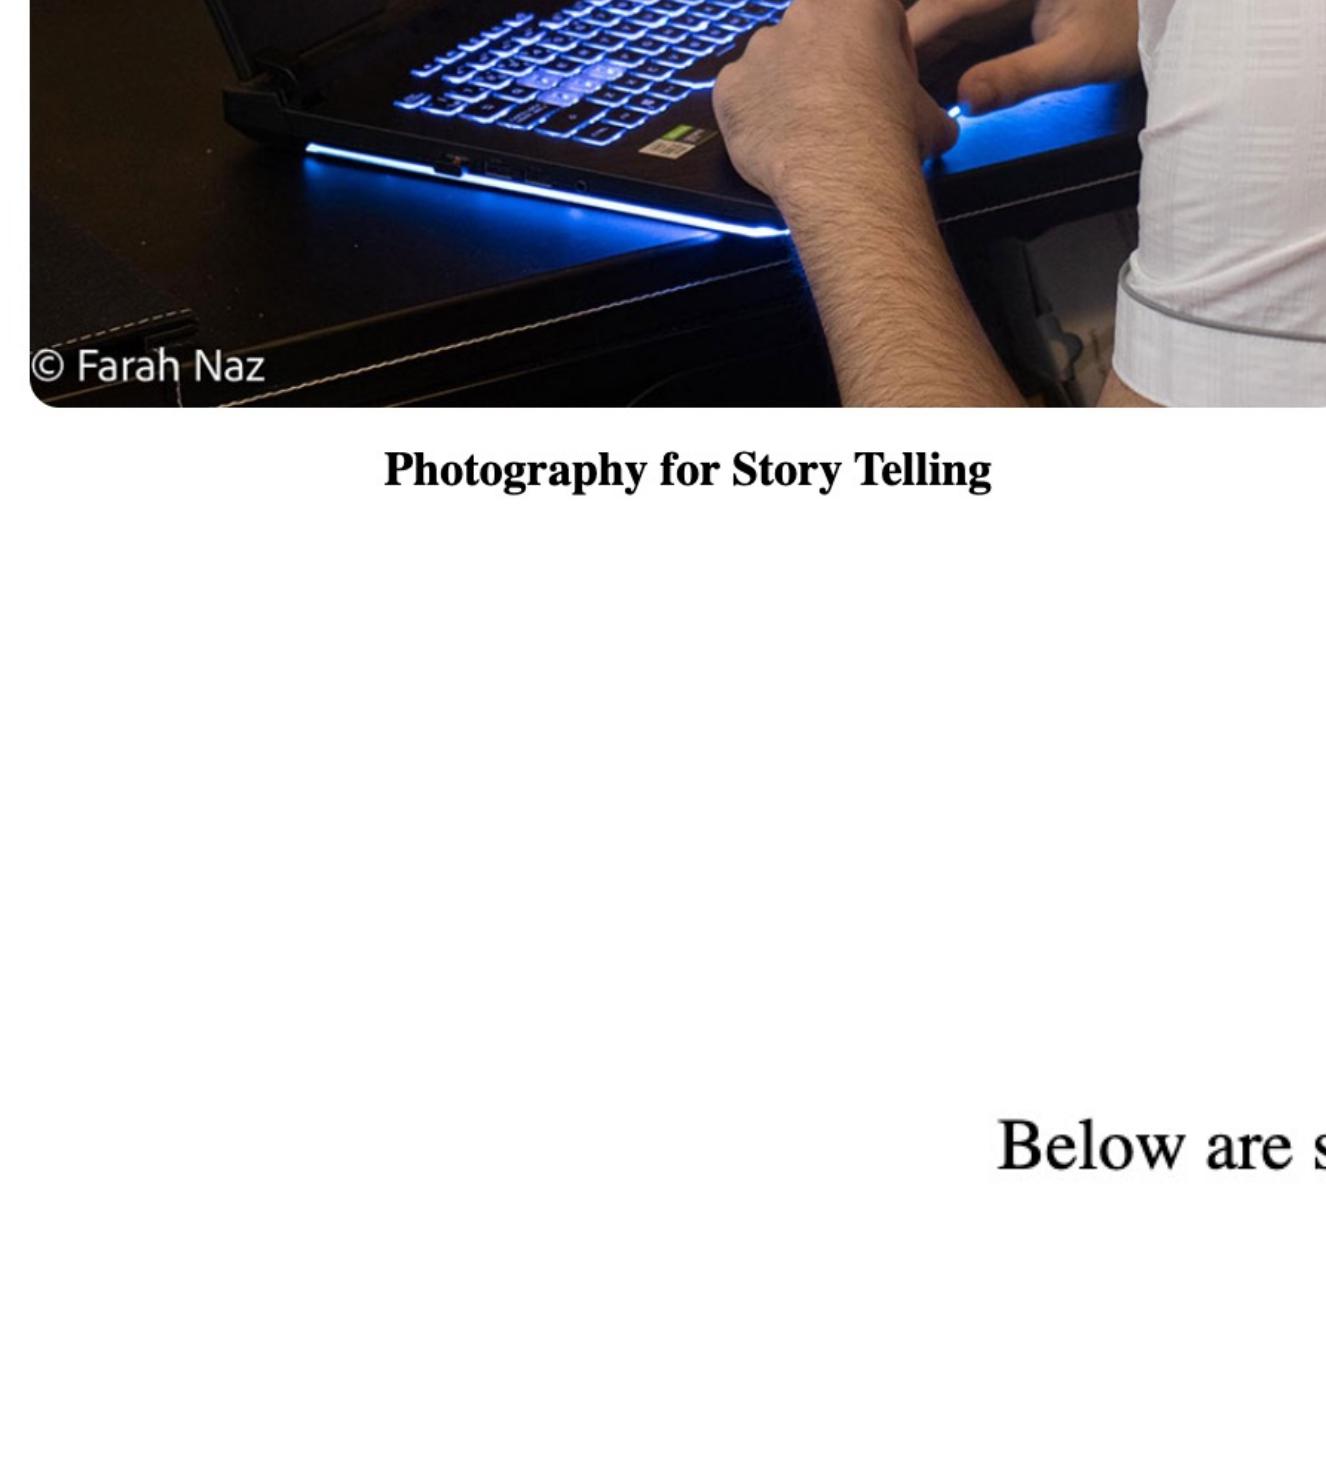

Double Exposure Style 1
